

QUALITY POLICY

ABIM Solutions is a Western Australian based company servicing the mining, exploration and civil construction industries. Through application of some of the most sophisticated technology available worldwide and constant innovation, our focus is on providing timely and accurate directional surveying, borehole imagery and geophysical logging tailored to meet the requirements of our clientele.

The company will ensure, through the implementation and continual review and update of a controlled Quality Management System, that the integrity of the company's operations is maintained at the highest possible level.

Key objectives for ensuring the highest level of quality within the organization include:

- Timely and proficient delivery of our services to ensure utmost client satisfaction.
- A commitment to engaging highly skilled personnel for optimal performance and output.
- Providing a work environment to facilitate the achievement of our clients' needs.
- Consistent supply of quality service through constant review and understanding of our clients' needs and expectations.
- Continual improvement of our quality management system by constantly monitoring and measuring the processes in line with the company's plans and objectives.

ABIM Solutions is committed to quality and the continual review and improvement of every facet of the organization.

Andrew Bewsher
Chief Executive Officer
